

Medical Solutions

Multimesh UK manufacture bespoke Medical Instrument Sterilisation Trays, and Din baskets for a variety of uses. With over 30 years experience in the field of wire mesh we are able to meet your needs.

The range is endless; our re-usable medical baskets ensure excellent drainage and therefore reliable decontamination results. Baskets can be produced to fit any machine and are manufactured using high grade stainless steel wire or perforated metal.

The range of products we design and manufacture includes:

- Din baskets
- Instrument trays
- Lids
- Laboratory receptacles
- Trolleys
- Specialist customised products

Rigorously polished, cleaned and inspected before dispatch – all of our products are Grade 304/316 stainless steel guaranteed for absolute peace of mind.

Multimesh UK
making wirework for you

Medical Solutions

Din Baskets

Double dins etc.

- Baskets that are suitable for various instruments i.e. forceps/scissors etc.
- Close-meshed side walls to prevent breakage of fine instrument tips.
- Smooth surfaces for preventing damage to surgical gloves.
- Lids offered for special protection of fine instruments (Micro, ENT) during processing, transportation and storage.

Half dins

- Very useful and versatile; produced in either wire mesh, perforated metal or a combination of both.

Standard dins

- These are manufactured to required measurements; again in welded or woven wire mesh/perforated metal or both.

Medical Baskets and Trays

Flat base Medical Baskets

- Possibilities for this style of basket are endless.

Instrument Sterilisation Trays

- Special instrument trays such as for scopes, micro instruments, small objects, mirrors/forceps/stainless steel apparatus, etc. Complete our product range.

Tray dividers

- Fitted compartments or adjustable dividers. Designed and developed to customers' requirements. These can be manufactured to fit any wash/ultrasonic/decontamination machine.

Trinket baskets/small basket

- Suitable for small items to be contained during wash cycle.
- A popular item which can be produced using a very fine mesh or one with a bigger aperture if required.
- All baskets can be supplied with or without lids. With or without catches, several options available.
- Baskets are supplied with various handle designs including inner mounted drop handles if required.

Medical Trolleys

- Open trolleys and lockable trolleys fully assembled, hand built to your specification in stainless steel.
